

“The combination of good and open communication together with competitive prices made UltraShip go for SERTICA, because we are able to make the developments and adjustments we need in SERTICA.”

Claus Bo Christensen, Marine Application at
Navigator Gas

Navigator Gas

Implementing a Safety Mindset

Navigator Gas decided to define a Safety Mindset already when it started up in 2013. Today, safety is an integral part of the company's mindset and a cross-cutting issue in all activities. Navigator Gas commits to developing and stimulating a safe working culture on-board ships and ashore. A Safety vision is formulated focusing on building the safety awareness of the employees: *We strive to be innovative in the way we manage safety in a spirit where we positively influence each other and constantly gain insight to reach the goal of zero incidents. We create an environment where it is possible to intervene and let ourselves be intervened whenever we see unsafe behaviour.*

To discuss and develop the safety behaviour at Navigator Gas, the SAFETY I's are continuously communicated and discussed internally.

The Integrated Management System is handled in SERTICA and Navigator Gas, Head of Marine QA says, "SERTICA supports all our working processes, both safety and in general. By using modules such as Inspection, Reporting, Activities and Events, we support the goals set out in our Safety Mindset booklet." He concludes:

“We plan to use SERTICA for many years to come, as it is part of everything we do.”

Optimising with Paperless Workflow and Invoice Scanning

The procurement department at Navigator Gas is a front-runner when it comes to implementing a paperless workflow. They manage the entire procure-to-pay workflow through SERTICA and implemented SmartSCAN. Before all invoices were handled manually which were quite time-consuming. The system can check the invoices for Navigator Gas and they are less dependent on specific people to approve invoices. With the Capture solution, they have minimised their administrative expenses and resources related to invoices.

Navigator Gas, Head of Purchasing & Procurement says, "I started working with SERTICA back in the nineties and the great thing about SERTICA is that it is constantly developing – the SmartSCAN solution is a good example of this. More importantly, RINA Digital Solutions is very good at including the customers in the development." Navigator Gas, Head of Purchasing & Procurement also highlights the distribution module in SERTICA

“The fact that our warehouse also uses SERTICA, simplifies things since everything is connected.”

What will the future bring?

Navigator Gas is currently implementing the PMS Fleet concept, which means that jobs are aligned across the fleet. Today each ship has created approximately 1000 jobs and 15-20.000 spare parts. Bjarne Juhl, ERP Specialist at Navigator Gas, acknowledges that RINA Digital Solutions has come a long way in implementing useful functionalities in SERTICA and he has many ideas for future

improvements. Navigator Gas, Head of Marine QA believes that Navigator Gas will intensify the use of SERTICA as “some modules have not yet been tested, so we are convinced that once we move from need-to-have in SERTICA to nice-to-have, life will become easier for many of us,” says Navigator Gas, Head of Marine QA.

“It is an advantage to be able to draw data from the same database”.

Bjarne Juhl, ERP Specialist at UltraShip

The Solution

- » SERTICA Maintenance
- » SERTICA Fleet Management
- » SERTICA Procurement
- » SERTICA HSQE
- » SmartSCAN integration
