Save time and money with SERTICA Maintenance

Release resources in the technical department and extend the lifetime of your equipment with SERTICA - a flexible software system that manages, monitors and documents maintenance tasks in all types of companies.

SERTICA is aimed at the often hectic life of a maintenance department and provides a quick overview of vital information. With scheduled and condition-based maintenance, you can follow and optimize maintenance jobs, equipment, components, inventory and the purchase of spare parts.

The software is supplemented with ongoing advice from consultants who know and understand the tasks and challenges in a maintenance department.

SERTICA ensures:

- » Reduced breakdowns and downtime
- » Manage inventory and usage
- » Maintain knowledge of equipment and machinery
- » Create better working conditions

“Planned maintenance has reduced downtime in the production by 50% and improved the production rate significantly. In addition, SERTICA gives us a better working environment with fewer unexpected tasks.”

DYNAUDIO

Key modules in SERTICA Maintenance

Document Management

Efficient solution to electronically store, update and distribute documents across the organization.

What you get:

- >> Document content search
- >> Online access to documents
- >> Access to the newest version of documents

Forms

Simplification of processes with predefined templates for reporting, checklists and working permits.

What you get:

- >> Easy reporting of required documentation
- >> Templates in MS Word and Excel
- >> Automatic import of data

Journal

Keep track of everything that affects your workday and the production during work shift.

What you get:

- >> Overview of all event
- >> Full integration with maintenance
- >> Knowledge sharing between employees

SERTICA App

Handle maintenance jobs through mobile devices and reduce the time needed in front of computer.

What you get:

- >> Complete and always updated job list
- >> Mobility, efficiency and availability
- >> Faster reaction to maintenance

Defect Reporting

Streamline workflows with the registration of defect reports and service requests electronically to the maintenance department.

What you get:

- >> Fewer mistakes and delays
- >> Easy and direct defect reporting
- >> Follow-up on defects in the system

Week Report

Full overview of registered hours, acquired vacations, overtime, participation in seminars and time off for a single employee - all in SERTICA.

What you get:

- >> Detailed overview of employee registration
- >> Flexible setup customized to the user
- >> Built-in approval workflow.

Analytics

Analytics is a unique tool that can extract and analyze any relevant combination of data. Data is exported from SERTICA to Microsoft Excel, where it is possible to draw graphs and pivot tables. With a few clicks you can get customized reports as "The 10 most expensive maintenance jobs" delivered directly to your email inbox.

What you get:

- >> Subscription to customized reports
- >> Effective data analysis
- >> Quick identification of operational savings

SYNC

SERTICA SYNC synchronizes data between SERTICA and the company's ERP-systems without integration problems.

What you get:

- >> Increased automation
- >> Strengthened financial control
- >> One shared data source, including suppliers, inventory, registration of hours and other master data.

Dynamic Dashboard

Design your own dashboards and achieve a better overview of your data in SERTICA. For example, your dashboards may contain information about job statistics, Excel graphs, and KPI highlights. You decide layout and colors and may include, for example, KPI thermometers, -traffic lights and speedometers.

What you get:

- >> Updated overview of your data
- >> Management tool for follow-up
- >> Modern and structured layout of information

SERTICA can be connected to other systems with different interfaces and thus become a central system in your company.

"A typical day for the maintenance technicians begins with looking at the job list in SERTICA to get an overview of the day's tasks. The simplicity and the overview creates a nice and positive work environment."

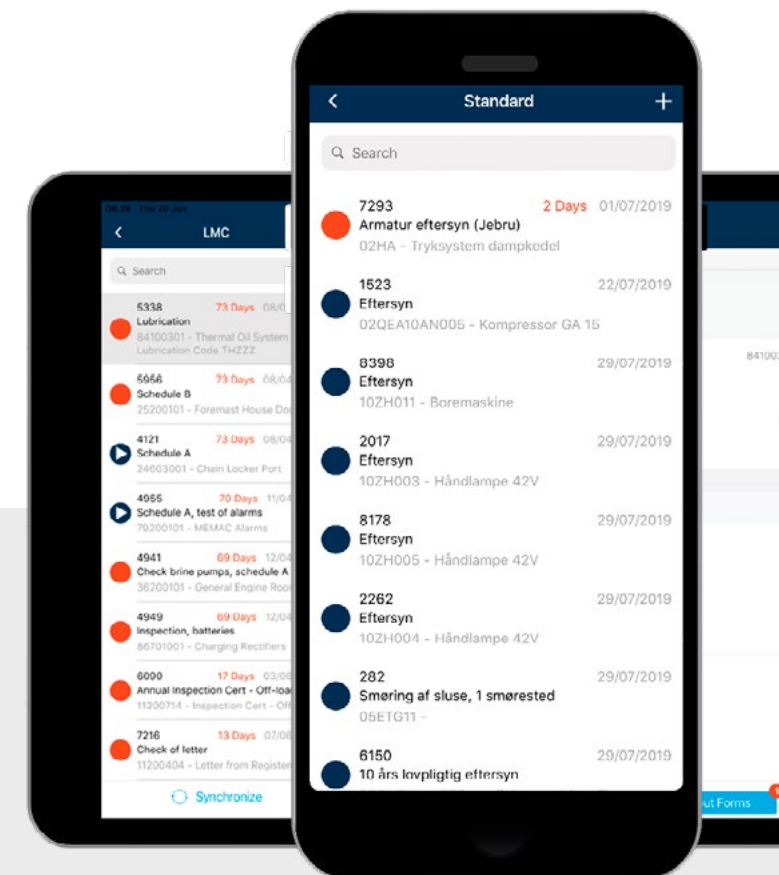

Tvilum

Use your mobile device as an important tool in the operation and maintenance department

The SERTICA app allows you to manage maintenance jobs and forms when you are on the go.

You can create, activate and end jobs from your SERTICA app. Each job contains a brief job description, history, and details about them related components. If you have Form module, you can also create, fill out and submit forms without attach documentation.

Report errors directly from the SERTICA app. Error reporting can be ad hoc maintenance jobs, which is discovered out in the field. Reporting makes it possible to measure and follow up on unforeseen tasks.

The image shows a large industrial facility, likely a pharmaceutical manufacturing plant. In the foreground, there is a large, vertical stainless steel tank labeled 'C1'. It is surrounded by a complex network of pipes, valves, and smaller tanks. The floor is made of reddish-brown tiles. In the background, more industrial equipment is visible, including another large tank labeled 'B' and various pipes and conduits running across the ceiling and walls. The lighting is bright, coming from overhead fixtures.

"Previously, the maintenance department carried out "summer holiday maintenance jobs" when large maintenance jobs required a production stop. Now maintenance jobs are carried out throughout the year. This ensures continuity of production throughout the year. It also makes it possible to carry out preventive maintenance."

More than just software

SERTICA is more than just a software system. We believe in collaboration and partnership, and we know that the right service and support makes all the difference in the world.

That is why we make it our business to go beyond what is expected. Our consultants are with you every step of the way and will help you implement your solution to ensure a smooth process.

If you have any problems or inquiries, help is never more than a phone call away. We offer consulting, training courses, and, of course, daily customer support. Support issues are handled immediately by software experts who know the solution and who can offer the very best guidance.

“SERTICA is intuitively designed with a tree structure which is similar to the pathfinder in a PC system, so it is very user-friendly and easy to access, and contains all the functions that we need to meet our needs.”

Associated Danish Ports (ADP)

SERTICA Maintenance includes document management, maintenance jobs, inventory, spare parts components, history and much more. It is developed in close cooperation with industrial and maritime customers worldwide and reflects both the needs of managers and everyday users.

SERTICA is owned by the international concern RINA which has a global network of 4,000 talented professionals operating out of 200 offices in 70 countries. We constantly perform technology scouting for innovative digital solutions to support our customers in facing the new challenges their business brings.
